

Milwaukee Section - American Chemical Society
Instrument Donation Program

Survey Form

The American Chemical Society's Instrument Donation program is designed to make used but operable instruments available to small colleges and high schools in our southeast Wisconsin area. This area includes the nine counties that are Jefferson, Kenosha, Milwaukee, Racine, Ozaukee, Sheboygan, Walworth, Washington and Waukesha. This survey is designed to determine what types of instruments are used by your organization and, if there are any future plans to update, are you willing to donate your used, operable equipment to these schools? The information obtained will be held in strict confidentiality. This is not a binding statement where we would call you to see if you are planning to donate. It is strictly voluntarily. Please return the survey to:

Peter Petersen 901 S Main St, Saukville, WI 53080 or response via e-mail peterp901@juno.com.

Primary business

Manufacturing including quality control	
Research and development	
Commercial testing laboratories	
Medical laboratories	
Others (specify)	

Types of equipment used by your organization

Infrared spectrometer	
Gas chromatography	
Inductive coupled plasma	
Atomic absorption	
High pressure liquid chromatography	
Others (specify)	

Considering update any equipment including glasswares	Yes	No
---	-----	----

If so, would you be willing to donate such items to a local high school or college, thus establishing a school and industry relationship. To assist in making the connection between the donor and the recipient, we would appreciate a source of contact.

Name of contact and title:	
Company name and address:	
Telephone number (extension, if any)	
E-mail address:	

To complete the donations, there is a form available at:
<http://alchemy.chem.uwm.edu/amalgamator/education/IDP>
where the donor can put the specifics of the equipment.

For more information about the program and its procedures and policies, please contact
peterp901@juno.com.
