

Employment Opportunity at SC Johnson

The Analytical Product Research Section of the Enterprise Innovation and Technology division of RD&E has an opening for a Research Scientist or Senior Research Scientist.

The ideal candidate will have:

- Ph.D. degree in physical-organic or analytical chemistry.
- Five years industrial experience.
- Experience with instrumental techniques of GC, HPLC, GCMS, LCMS and FTIR

The person in this position will:

- Serve as liaison between Product Development Divisions and Analytical Product Research.
- Develop and validate analytical methods of assay.
- Serve as GLP (FIFRA) Study Director.
- Design and perform experiments to solve problems in formulation and production.
